

Intersoft Electronics – Test Technician

We are looking for a Test Technician

Intersoft Electronics is a Belgian company that develops and offers products and services to manage and monitor air traffic. Our mission is to create groundbreaking solutions and enable our customers to effectively carry out their duties as air traffic controllers and airspace monitors. Our products and services are used worldwide!

Why choose Intersoft Electronics?

Are you someone who loves challenges, values teamwork, and thrives in a dynamic work environment? At Intersoft Electronics, we offer more than just a job—we offer an opportunity to give your career a flying start and make a lasting impact.

Your role:

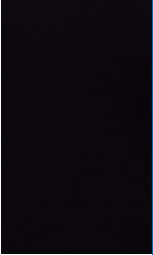

As a Test Technician, you'll play a crucial role in the production process and quality assurance of electronic devices.

Your responsibilities include:

- Receiving assembled printed circuit boards and performing initial tests.
- Proactively troubleshooting issues when test failures occur.
- Retesting subcomponents after assembly in production.
- Clearly communicating with the production department and discussing findings when test failures occur.
- Preparing detailed test reports.
- Accurately reporting in accordance with applicable ISO standards to ensure quality standards are met.
- Being responsible for calibrating devices to meet specifications.
- When devices are returned by customers, performing recalibration, repairs, and troubleshooting.
- Conducting repeat tests after the maintenance phase.
- Accurately record all necessary information in files and reports.
- Provide active support to engineers and R&D in testing and developing new products, including prototyping.
- Document all tests performed in detail in reports and templates.
- Provide internal technical support to colleagues abroad.

Your profile:

- You have a bachelor's degree and possess analytical and problem-solving skills.
- You demonstrate a genuine interest and enthusiasm for the field of technology, and you want to stay up to date on industry trends.
- You have specific knowledge of MS Electronics, which enables you to perform the job efficiently and

effectively.

- You are fluent in both English and Dutch, with the ability to communicate effectively in a multicultural and multilingual work environment.

What do we offer you?

- A congestion-free working environment and flexible working hours.
- Fun company activities with great coworkers.
- A varied job in a stimulating, high-tech work environment.
- Opportunities for personal development and learning.
- A permanent position with a competitive salary, group insurance, meal vouchers, and more.
